Our doctors prescribe x-rays based on individual caries risk levels, previous history, and American Academy of Pediatric Dentistry guidelines. **If prescribed, is it okay for your child to have x-rays today?**	Y / N
We strongly recommend a fluoride treatment every 6 months for your child. However, some insurance companies may not cover this due either frequency or age limitations.** Based on the insurance information currently in our system, your child's fluoride treatment should be: ____ covered today _____an out of pocket cost of $_____ ***This coverage information does not include any deductibles that may need to be met before coverage is provided under some dental plans. We will bill to insurance first to confirm coverage, and send you a bill for any balance after insurance makes that determination.* **Based on this information, is a fluoride treatment okay for your child today?**	Y / N

Periodic Exam Financial Coverage Agreement: *I understand that today's visit will include a periodic exam and cleaning (prophylaxis). It may also include a fluoride treatment and x-rays. If my current insurance policy does not cover all or part of these services for any reason, or if my listed insurance policy is terminated and no updated insurance information is provided, I understand that I am fully responsible for any balance due to my account. I also understand that if my insurance policy does not cover today's visit at 100% for any reason, my copayment may be collected at the end of today's visit, or I will be billed after the insurance payment has been received. If I do not have insurance, I understand that my balance is due in full today.*
